

HOUSE MANUAL

House Manual

How everything in the house works

PROPERTY

Two-bedroom home, Atlantic Seaboard,
Cape Town

REFERENCE

SAMPLE-A

STYLE

Premium villa-style home

CHECK-IN / OUT

14:00 / 10:00

1 How to use this manual

A published AssetProof sample. A real, complete record with every identifying detail removed — no address, no owner or agent name, no contact details, and no image showing a street frontage, a neighbouring property or a vehicle registration.

Every appliance and system in the house, what it is, and how to get the best out of it. If something does not behave as described here, WhatsApp +27 82 221 4313 and we will sort it out.

2 Kitchen

APPLIANCE	HOW IT WORKS
Fridge / freezer — Bosch French-door, NoFrost	Controls are on the door. The VitaFresh plus drawers are humidity-controlled for fruit, vegetables and fish; the BigBox freezer drawer takes the tall items. NoFrost means it never needs defrosting.
Dishwasher — Bosch Serie 4	Eco 50° is the everyday setting and the quietest. Silence mode is worth using if anyone is sleeping. Rinse aid and salt are already loaded; the filter is in the base if something blocks.
Oven — Whirlpool built-in	The left dial selects the function, the right sets the temperature from 50 to 250°C. Give it ten minutes to come up to heat.
Gas hob — Whirlpool, four burner	Press and turn the control to spark the built-in ignition, and hold it in for a second or two until the flame settles. The cast-iron supports get very hot and stay hot.
Extractor hood	Five buttons on the canopy front: light, and four fan speeds. Run it while the gas is lit.
Microwave — Samsung	Sensor-cook programmes are on the fascia; the dial sets time.
Coffee — Nespresso	Capsule machine. Fill the tank at the back, drop a capsule in, and lift the lever to eject it into the bin behind the drip tray.
Kettle and toaster — Haden	On the counter. A stovetop whistling kettle is there for the gas hob if you prefer it.
Blender — NutriBullet	Fill the cup no higher than the marked line, twist the blade on and press down onto the base to run it.
Bins and recycling	A pull-out bin unit is under the counter with wicker baskets alongside for dry recycling.

3 Laundry

APPLIANCE	HOW IT WORKS
Washing machine — Bosch Serie 6, 9 kg	In the garage. EcoSilence Drive, so it is quieter than it looks; VarioPerfect trades time against energy. Detergent drawer top left.
Tumble dryer — Bosch, 8 kg	Beside the washer. The SensitiveDryingSystem setting is the one for anything delicate. Empty the lint filter between loads.
Drying rack and iron	A folding wooden airer stands in the garage and the ironing board is in the store room.

4 Heating, cooling, light and hot water

SYSTEM	HOW IT WORKS
Underfloor heating	Controlled on the OJ Microline thermostat on the living-area wall — the rotary dial sets the temperature and the slide switch turns the zone on. It warms slowly, so set it and leave it rather than turning it up.
Air-conditioning — Jet-Air J-Smart	One indoor unit in the living area and one in the second bedroom, each with its own remote — the bedroom remote sits on the bedside table. Close the doors and shutters while it runs.
Lighting	A three-button dimmer plate sits beside the underfloor thermostat; a swing-arm wall sconce lights the console table.
Shutters and blinds	Plantation shutters through the living and dining rooms, a roller blind in the primary bedroom, sheer curtains in the second bedroom, and venetian blinds above the bath and in the second bathroom. Tilt the louvres for light without glare.
Backup power	The house carries its own inverter and lithium battery installation in the plant room — MECER and LUXPOWERTEK inverters with a HUBBLE lithium battery. It switches over on its own; there is nothing for you to do.

5 Security and connectivity

SYSTEM	HOW IT WORKS
CCTV	A Hikvision multi-camera system covers the outside of the property, including the driveway. The monitor is in the garage. Cameras face outward only.
Alarm	An Olarm MAX communicator with an alarm panel and armed-response signage at the boundary. Arming and disarming is explained at check-in.
WiFi	Fibre to the house with TP-Link mesh units, including one at the bedroom work desk. The network name and password are given to you at check-in.
Safe	A keypad security safe is fitted on the shelving inside the walk-in dressing cupboard off the second bedroom. We set the code with you at check-in and clear it once you have gone.
Keys	A lockable key cabinet is mounted in the garage.
Garage door	Sectional roller door on an overhead motor, opened by remote.

6 Bedrooms and bathrooms

ROOM	WHAT IS IN IT
Bedroom 1 — primary, sea-facing	Double bed with an upholstered winged headboard, bedside tables and matched lamps, a sliding-door wardrobe with rails, shelves and drawers, and a floating work desk carrying the mesh WiFi unit and the USB charging hub.
Bathroom 1 — en suite to Bedroom 1	A bath with a handheld shower, a separate frameless glass shower with an overhead rose, a vanity with an above-counter basin, a toilet, a towel rail and rings, and a venetian blind above the bath.

ROOM	WHAT IS IN IT
Bedroom 2 — Lion's Head outlook	Double bed with a curved upholstered headboard, a round bedside table and lamp, a floating desk under a round mirror, and a built-in wardrobe with sliding and mirrored doors. A walk-in dressing cupboard runs off it, with full-height shelving and the fitted safe.
Bathroom 2 — off the dressing cupboard	A walk-in shower with a mosaic feature border, a wall-faced toilet, a stone-topped vanity with an above-counter basin, and its own window with a venetian blind.

7 The braai and the outdoors

ITEM	HOW IT WORKS
Gas braai — Megamaster, four burner	Open the hood before you light it. Turn the gas on at the bottle in the cabinet base, press and turn a burner control to ignite, and give it ten minutes on high with the hood down to come up to heat. Close the bottle valve when you finish and let the grates cool before you drop the hood.
Patio and balustrade	Composite-wood deck with a cable-and-post balustrade. Sweep it down after windy days; the south-easter carries sand up the hillside.
Hanging egg chair	Hung from the pergola beam. One person at a time.
Terraced garden	Trellised grapevines and lavender beds on the terraces below the patio. A gardener attends; please leave the vines alone.

8 If something goes wrong

If something goes wrong

WhatsApp +27 82 221 4313 at any hour. For a power failure, the backup installation carries the house and needs no action from you. For a water leak, the main stopcock is at the boundary on the driveway side. In an emergency dial 112 from any mobile, 10111 for police or 10177 for an ambulance.
