

FOR DEVELOPERS & ESTATES

# Document It Once. Prove It For Ten Years.

A maintenance manual and living signoff record that protects the developer, equips the body corporate, and feeds the reserve fund.

---

FOR

Developers · bodies corporate · managing agents

AT

Estate handover (or any time after)

YOU GET

Manual + signoff register + 10-yr plan

THEN

An annual re-capture keeps it live

---

## 1 The handover gap everybody pays for later

An estate is signed over with no usable maintenance record — and the cost surfaces years later, in court or in a special levy.

Developers carry latent-defect exposure for years after handover. Bodies corporate are obliged to maintain and to keep a 10-year plan and reserve fund — but rarely have the document to do it. AssetProof closes that gap with one capture at handover that serves **both sides**.

## 2 Who gains, and how

| PARTY                | WHAT THEY GET                                                         |
|----------------------|-----------------------------------------------------------------------|
| Developer            | A DEFENSIBLE RECORD                                                   |
| Body corporate / HOA | A compliance-ready maintenance manual, 10-year plan and reserve guide |
| Managing agent       | A premium value-add to attach to every scheme they run                |
| Maintenance partners | A clear, costed schedule that becomes recurring service work          |

## 3 The mechanism

### The mechanism

At handover the body corporate **signs for the manual** and its maintenance obligations. From then on, every task is dated and photo-evidenced in a **living signoff register**. Whether a future dispute favours the developer or the scheme, the truth is simply on the record — we are the **neutral system of record** both sides can trust.

## 4 How it works

1. We capture every common-area feature at handover (or retrospectively). 2. We produce the manual, the 10-year plan and the signoff register, branded. 3. An **annual re-capture** keeps the record live and compares year-on-year — what's aged, what's been done, what's due.

## 5 Why it sells

### Why it sells

It's a small fee against a large, slow-moving liability — and a recurring relationship, not a one-off. Document once; prove it for a decade.

## 6 Next step

We'll document one estate as a reference, with pricing for the manual and the annual upkeep.
